

# Community Open House

## Valley Lateral Project

### Welcome

#### New Project

Millennium Pipeline Company is proposing a new project to install approximately eight miles of lateral pipeline between Millennium's mainline in Orange County, New York, and the CPV Valley Energy Center in Wawayanda, New York.

#### Route

Potential routes are currently being evaluated and a preferred route has not yet been finalized.

#### Community Benefits

Millennium Pipeline's new natural gas lateral to the CPV Valley Energy Center represents a final step in the development of this community supported project, and brings the region a step closer to lower energy prices, new jobs and greater economic activity.

#### Clean Energy

The CPV Valley Energy Center will use natural gas transported on the Millennium Pipeline to bring clean energy and a major economic investment to Orange County.

#### Reliability

The CPV Valley Energy Center will generate enough electricity to power more than 650,000 homes in the region and help reduce the high energy costs New Yorkers face.

#### Cleaner Air

Millennium Pipeline is proud to support the CPV Valley Energy Center in its effort to provide reliable power while reducing the region's dependence on older and less-efficient sources of energy and improving the air quality in our communities.
