

# Safety

## Valley Lateral Project

**OUR TOP PRIORITY IS TO ENSURE PUBLIC SAFETY THROUGH RESPONSIBLE OPERATIONS.**

We are proud of our unwavering commitment to the safety of our employees, our contractors, the environment and the communities we serve.

**SAFETY FIRST, SAFETY NOW, SAFETY ALWAYS.**

Our gas control and monitoring center offices operate 24 hours a day, seven days a week. We regularly patrol our pipeline rights-of-way. We conduct regular inspections of our pipeline system, and our Operations employees receive regular training and are qualified under U.S. Department of Transportation regulations for natural gas pipeline operators. Employees are on call at all times, ready to respond to any situation.
