12.0 PCB CONTAMINATION.....	12-1

## LIST OF ACRONYMS

CPV	CPV Valley, LLC
Millennium	Millennium Pipeline Company, L.L.C.
MP	Milepost
PCB	polychlorinated biphenyl
Project	Valley Lateral Project

<b>RESOURCE REPORT 12—PCB CONTAMINATION</b>	
<b>Filing Requirement</b>	<b>Location in Environmental Report</b>
<ul style="list-style-type: none"> <li>For projects involving the replacement or abandonment of facilities determined to have PCBs, provide a statement that activities would comply with an approved EPA disposal permit or with the requirements of the TSCA. (§ 380.12(n)(1))</li> </ul>	Not Applicable
<ul style="list-style-type: none"> <li>For compressor station modifications on sites that have been determined to have soils contaminated with PCBs, describe the status of remediation efforts completed to date. (§ 380.12(n)(2))</li> </ul>	Not Applicable

## 12.0 PCB CONTAMINATION

Millennium Pipeline Company, L.L.C. (Millennium) is seeking authorization from the Federal Energy Regulatory Commission pursuant to Section 7(c) of the Natural Gas Act<sup>1</sup> to construct, install, own, operate, and maintain the Valley Lateral Project (Project). The Project will provide firm transportation of natural gas to the new 650 megawatt gas-powered CPV Valley Energy Center being constructed by CPV Valley, LLC (CPV) in the town of Wawayanda, New York. The Project, as proposed, includes approximately 7.8 miles of new natural gas pipeline that will extend from Millennium's existing main line pipeline north to the CPV Valley Energy Center, as well as ancillary aboveground facilities. The target in-service date for the Project is April 2017.

The Project consists of the following components and facilities:

- approximately 7.8 miles of new 16-inch diameter pipeline in Orange County, New York;
- one delivery meter station and associated piping at the CPV Valley Energy Center, approximate milepost (MP) 7.8;
- one launcher facility (MP 0.0); and
- one receiver facility at the CPV Valley Energy Center (MP 7.8).

Resource Report 12 addresses potential polychlorinated biphenyl (PCB) contamination associated with replacement, abandonment by removal or abandonment in place of facilities determined to have PCBs or modifications to compressor stations on sites determined to have soils contaminated with PCBs.

The Project does not involve the replacement, abandonment by removal or abandonment in place of any pipeline facilities and does not involve the modification of any compressor station facilities. Therefore, Millennium does not anticipate concerns or impacts associated with PCB contamination. Based on the scope of proposed facilities, no resource report on PCB contamination is required by the Federal Energy Regulatory Commission.
